

# Downeaster Thunder Farm Blue Whale

Copyright 2017 Downeast Thunder Farm

Create two mirror images of this whale for a double-sided ornament.  
Note: I used two strands of floss throughout.

Start by positioning the belly on the body. Use a blanket stitch in white along the top part of the bell to attach it to the body. Create the decorative stitches as outlined in the pattern with a series of running stitches with blue floss that matches your blue felt.

Create the eye with a trio of black seed beads or French knots. Outline the eye with white. Position the fin and attach with a blanket stitch along the top edge with your blue floss.

Sew the front and back pieces together using a blanket stitch with matching colored floss. Pause before completing to lightly stuff with fiberfill.

Have fun!
