

# Downeast Thunder Farm Sperm Whale

Copyright 2017 Downeast Thunder Farm

Create two mirror images of this whale for a double-sided ornament.

Sperm whales are a dark brownish-gray. You might use a gray for this pattern. I opted for a purply-gray color for mine.

Cut a small oval of felt for the eye; position and tack. With black floss, create the mouth with a running stitch. Add the decorative stitching to the tail. Using a matching color floss, tack the fin on with a running stitch along th edge.

Sew the front and back pieces together using a blanket stitch with matching colored floss. Pause before completing to lightly stuff with fiberfill.

Have fun!
