

Downeast Thunder Farm Bottlenose Dolphin

Copyright 2018 Downeast Thunder Farm

Create two mirror images of this dolphin for a double-sided ornament. Position the belly; tack with one strand of gray floss on the inside of the pattern piece. Tack the flipper into place with gray floss. With one strand of black floss, sew the mouth as outlined in the pattern. Create the eyes with two black seed beads - or two black French knots. Add the decorative stitching at the tail.

Sew the body front and back together with a blanket stitch using two strands of gray floss, pausing to lightly stuff with fiberfill before finishing.

Have fun!

Susan
