

Downeast Thunder Farm Retro Christmas Camper

Copyright 2019 Downeast Thunder Farm

- Use two strands of green, gray, or white floss to add all of the decorative stitches.
- Layer the tire pieces and tack with white floss. Finish off with a circle of gray in the middle. Position the lower body and stitch along the top edge with a white running stitch.
- Position the windows and tack with a white running stitch around the edges. Position the fin and tack with two running stitches through the middle.
- Stitch the outline of the door with a gray backstitch. Top the door and windows with a row of gray running stitches.
- Position the tree. Tack with red, blue, yellow, and green seed beads, catching the tree trunk with one of the beads.
- Sew the green backstitch for the lights. Finish off with the same beads used on the tree. Tack the hitch to the back of one of the camper sides.
- Using two strands of matching white floss, sew the two sides together with a blanket stitch. Before you finish the blanket stitch, pause to lightly with fiberfill.

Have fun! *Juan*
